# WK01 LAB 00: Model View Controller

## Questions and Answers

1. Who did you work with?
  - a. Francisco Hernandez and Riley Galloway
2. How many Classes are there in the starter code?
  - a. 4 (Four)
3. What are the class identifiers (Hint: one is Model)
  - a. View, Textview, Model, and Controller
4. What is meant by 'late binding'?
  - a. Late binding is Runtime Binding, as in it's called while the code is running instead of right from the start. It has unknown variables that are filled in as the program runs.
5. What is a virtual method?
  - a. A virtual method is an implementation in a base class as well as the derived class.
